

PARTICIPANT'S GUIDE

About the Event

The 4th Qatar-Poland New Tech Forum, a flagship event dedicated to advancing technological innovation and bilateral collaboration, is set to take place on 26 September in Doha, Qatar. This year's forum will be held under the name One True Data and will bring together leading tech experts, along with business and thought leaders to explore cutting-edge trends, share insight and forge valuable partnerships. The Qatar-Poland New Tech Forum is an annual event that catalyzes technological collaboration between Qatar and Poland. The forum aims to drive innovation, foster partnerships and create a lasting impact on both nations' tech landscapes.

Building upon the success of previous editions, the Forum aims to facilitate a dynamic exchange of ideas and expertise in fields such as renewable energy, environmental protection, smart cities, logistics, cybersecurity, and more. With a focus on harnessing the potential of emerging technologies, attendees can expect engaging panel discussions and keynote speeches. The forum will feature a diverse line-up of distinguished speakers, including industry pioneers, government officials, and academic luminaries, who will share their insights on the latest trends, challenges, and opportunities in the tech landscape. Attendees will have the chance to network with like-minded professionals, explore potential partnerships and gain valuable insight into the tech ecosystems of both Qatar and Poland.

The increasing challenge of managing diverse and unstructured data in organizations, collecting and cleaning data for analysis takes up a significant portion of the project time. The value of data is derived from its usage rather than its mere existence. The upcoming event will address various aspects of Big Data dynamics and its role in sectors such as energy and cybersecurity. The forum's one of many objectives is to raise the subject of integrating renewable energy sources through technologies like the Internet of Things and blockchain to optimize energy utilization and stabilize power grids. With cybersecurity and interoperability concerns looming, the onus is on us to navigate this evolving landscape with prudence and collaboration. By doing so, we stand on the threshold of transforming industries, safeguarding our future, and realizing the full potential of data-driven innovation.

Participants can look forward to engaging sessions

- Technology-driven economic transformation. Prospects for the Polish and Qatari business.
- Use of trusted data in analytics to improve performance.
- Technology advancement in achieving net zero objectives.
- Successful deployment and use of renewable energy systems.
- How CCUS technologies support achieving climate goals and the power transition.
- Sensor Open Systems Architecture (SOSA™) – UAVs management.
- AI and cybersecurity for critical infrastructure.

Event Agenda

Day 1: 26 September, Tuesday

08:00-09:00 Registration

09:00-09:30 Opening remarks from host and organizers

09:30-10:30 **Session One: Potential for Polish-Qatari business projects**

- Technology-driven economic transformation
- Prospects for the Polish and Qatari business
- Poland and Qatar - building a strong economic partnership

10:30-10:45 **Coffee break**

10:45-12:00 **Session Two: Data Imperative in the Oil & Gas Industry**

- Importance of Trusted Data
- Use of Trusted Data in Analytics to Improve Performance

12:00-13:00 Networking lunch

13:00-14:15 **Session Three: Renewable Energy & Carbon Capture and Storage**

- Technology advancement helping in achieving Net Zero objectives
- Examples of successful “green” cases in the Energy industry

14:15-14:45 Networking coffee and dates

14:45-16:00 **Session Four: Security & Aerial/Orbital Data Acquisition**

- The human factor in cybersecurity
- AI and cybersecurity for critical infrastructure
- Sensor Open Systems Architecture (SOSA™) - UAVs management

16:00-17:00 Networking event on the exhibition floor

19:00-22:00 Dinner on a boat – a tour of Doha (for our sponsors & speakers only)

Day 2: 27 September, Wednesday

11:00-13:00 Networking event

14:00-19:00 Inland Sea desert trip, dinner at the Bedouin camp (optional)

The 4th Qatar-Poland New Tech Forum is organized in partnership with The Open Group OSDU Forum

The OSDU Data Platform reduces costs, breaks down data silos, enables innovation, and brings data together in one location.

[The Open Group OSDU™ Forum \(osduforum.org\)](https://osduforum.org)

OSDU MISSION & VISION

The Open Group OSDU Forum delivers an Open Source, standards-based, technology-agnostic data platform for the energy industry that stimulates innovation, industrializes data management, and reduces time to market for new solutions.

The OSDU Forum seeks to reduce data silos to enable transformational workflows, accelerate the deployment of emerging digital solutions for better decision making and create an open, standards-based ecosystem that drives innovation for the energy industry.

OSDU MEMBERS

Industry leaders such as Qatar Gas, Abu Dhabi National Oil Company (ADNOC), Saudi Aramco, Accenture, BP, Schlumberger, Shell, ConocoPhillips, ExxonMobil, Halliburton, PETRONAS, Orlen, IBM, Intel, Microsoft, EY, and many others.

OSDU BUSINESS STRATEGY

In response to the dual challenge of meeting the world's increasing energy demands meanwhile reducing greenhouse gas emissions the energy sector is transitioning towards renewable energy resources while ensuring the continued delivery of existing energy sources such as oil and – increasingly – natural gas. As part of this transition, several operators have started their transition by setting clear emission targets and new business strategies to obtain these targets and address the challenge.

As part of this transition, we see the operating model of some companies changing from traditional Upstream and Downstream businesses towards more integrated energy delivery services directed to the consumers (B2C and B2B). These new service lines streamline energy delivery and enable flexibility of energy resources which are guided and influenced by consumer demands. This we already see happening to an extent in the gas business.

This transition is not only controlled by the Operators but to a large extent driven by policies in particular countries or regions (such as the EU). The Operators' response and drive are likely to vary from region to region. With the increasing legislative demands, a complex mix of energy resources and service lines data is an important enabler to achieving cost efficiency, transparency, and compliance. Therefore, a common data platform for fast access to data from all parts of the business lines will become imperative.

Event Venue

The 4th Qatar-Poland New Tech Forum will take place at The Ritz-Carlton, Doha, and will adhere to all necessary health and safety guidelines to ensure a safe and productive experience for all attendees.

THE RITZ-CARLTON
DOHA

Rising above the Arabian Gulf's sweeping shades of blue, The Ritz-Carlton, Doha, is an invitation to access the extraordinary. From spacious rooms to signature suites commanding impressive sea views and a high-rise Club Lounge with exclusive privileges, every detail sets the scene for a luxury stay in Qatar. A rare city resort, this landmark in Qatar features immersive outdoor and indoor pools, a wide sandy beach, and lush landscaped gardens. The award-winning hotel restaurants & lounges are highlights to the Doha dining scene, with experiences ranging from a modern steakhouse to a day-to-night terrace home to high-end Asian fusion cuisine and refined mixology. Here, indulgence is found at The Ritz-Carlton Spa where authenticity and modernity converge whilst the fitness center offers incomparable facilities for the seasoned traveler. With distinct features including the Middle East's largest chandelier, the resort is a favored venue for lifetime celebrations and fairytale weddings.

Our guests enjoy a special discounted rate:

Contact

The Qatar-Poland Business Council

The Qatar-Poland Business Council (QPBC) is a non-profit organization based in Doha, Qatar.

We are active in Qatar, as well in Poland, and across the European Union.

We are committed to strengthening Qatari-Polish financial, commercial, and cultural ties. The main objective of the Qatar-Poland Business Council is to attract investments into both countries. It aims to become a unifying platform for Qatari and Polish business interests, promote mutual understanding and enhance bilateral relations.

We pride ourselves on being an open and diverse organization. We welcome anyone who shares our common vision of strengthening the Qatari-Polish relations.
